

Sonoma County, California
Why curbside oil and filter recycling?

We brought curbside oil and filter recycling to your door to increase convenience. 50% of oil generated by do-it-yourself oil changers in Sonoma County is not currently recycled, an estimated 140,000 gallons annually. Even fewer oil filters are recycled. Now recycling is so easy that there is no reason not to recycle oil and filters. All we ask is that you protect the environment when changing your oil.
